In order to apply the below settings correctly and add an ICC profile, please go to CP-D90DW  
➔ **Printer Settings** ➔ **Options** menu of the driver interface and select:

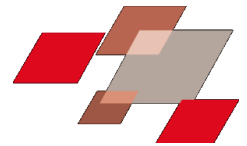

In order to apply the above settings correctly, and add an ICC profile, please go to:  
[Print Picture](#) → [Choose CP-D90DW](#) → [Options](#)

→ [Color Administration](#)

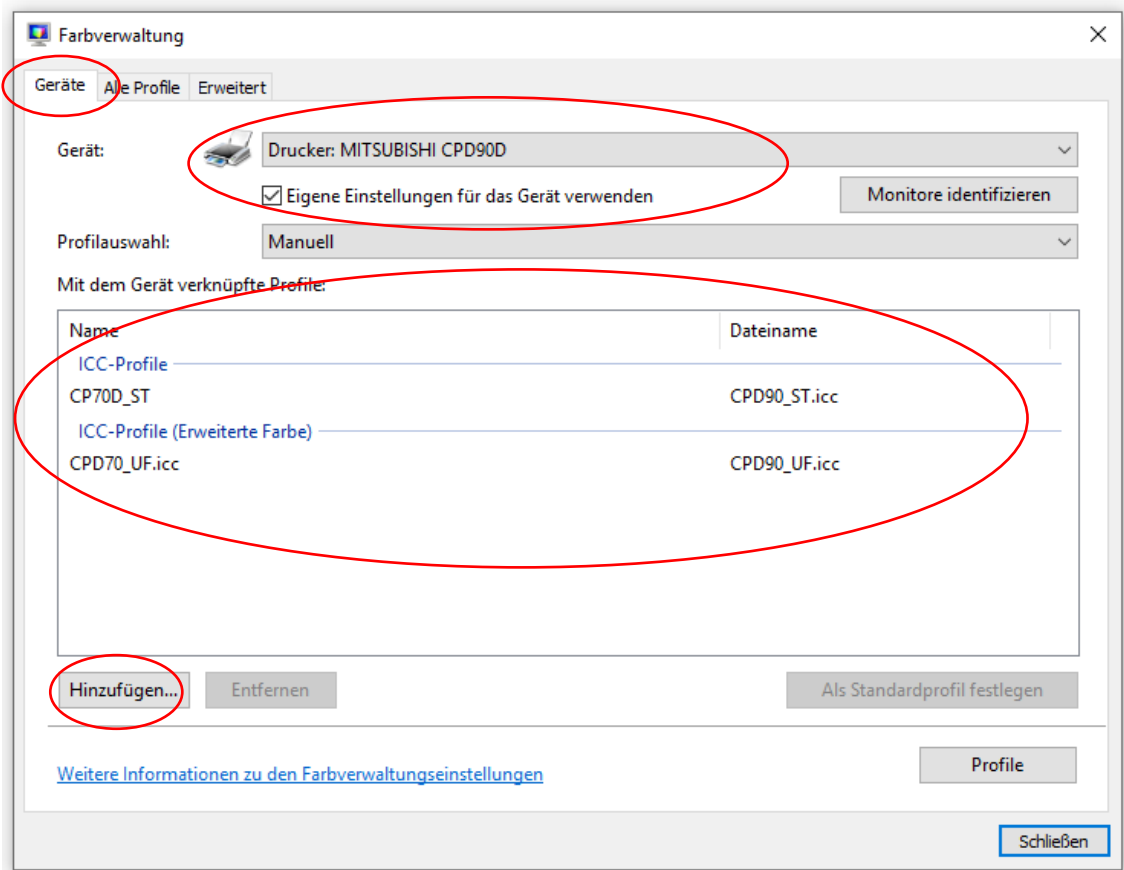

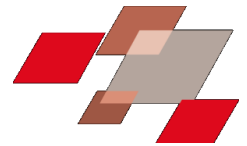

→ **Devices** menu of the driver interface and select:

- o The correct printer must be shown (CP-D90DW printer must be connected and ON)
- o Click the option “[Use my configuration for this device](#)”
- o Add the corresponding .icc file by clicking the [Add](#) button at the bottom and select your file from your computer.

Once selected, the ICC-file will be shown like below.

You can now close this menu.  
The profile added will be applied in the final print.

## CP-D90DW(-P) instructions to use ICC profile

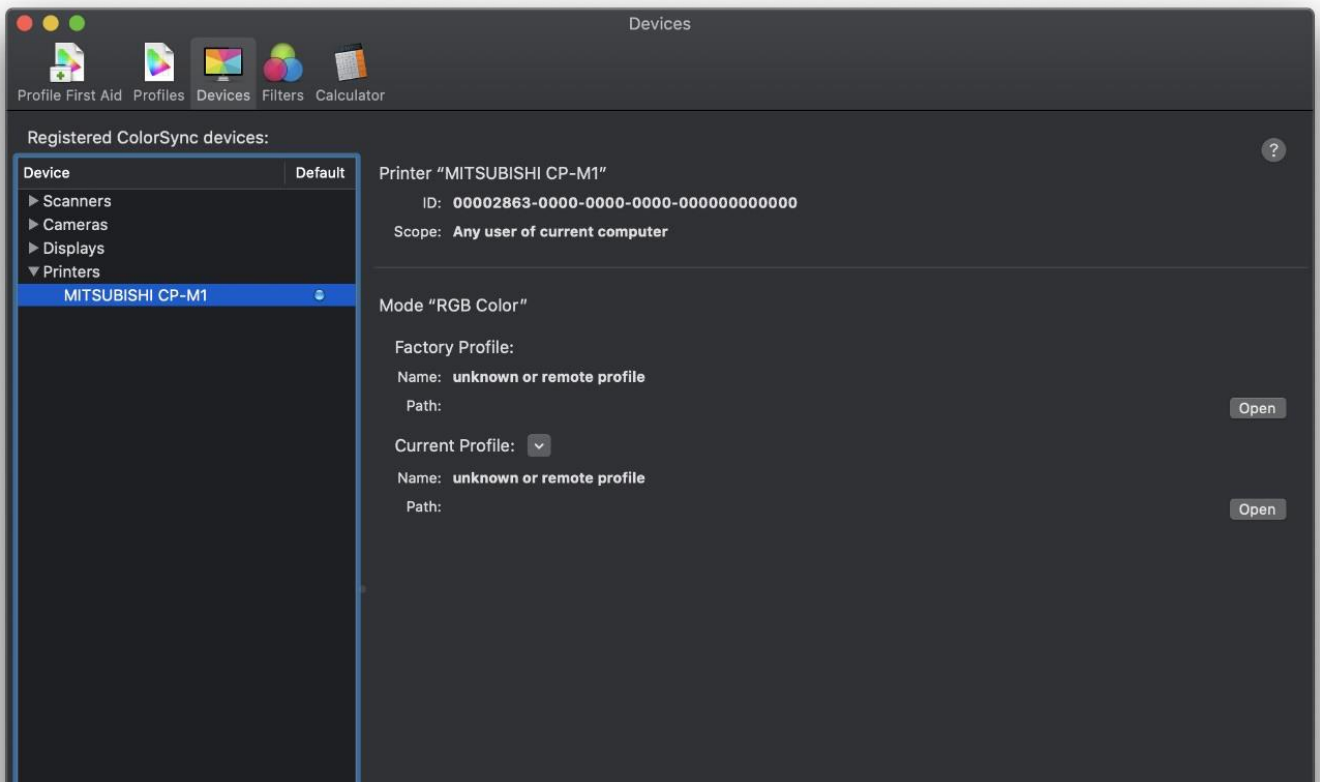

20/03/2020

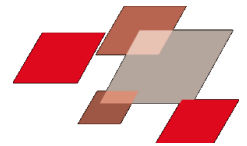

If you have previously installed the CP-D90DW **Mac Driver** on your Mac

Open your [Mac's Colour Sync application](#) and select your CP-D90DW.

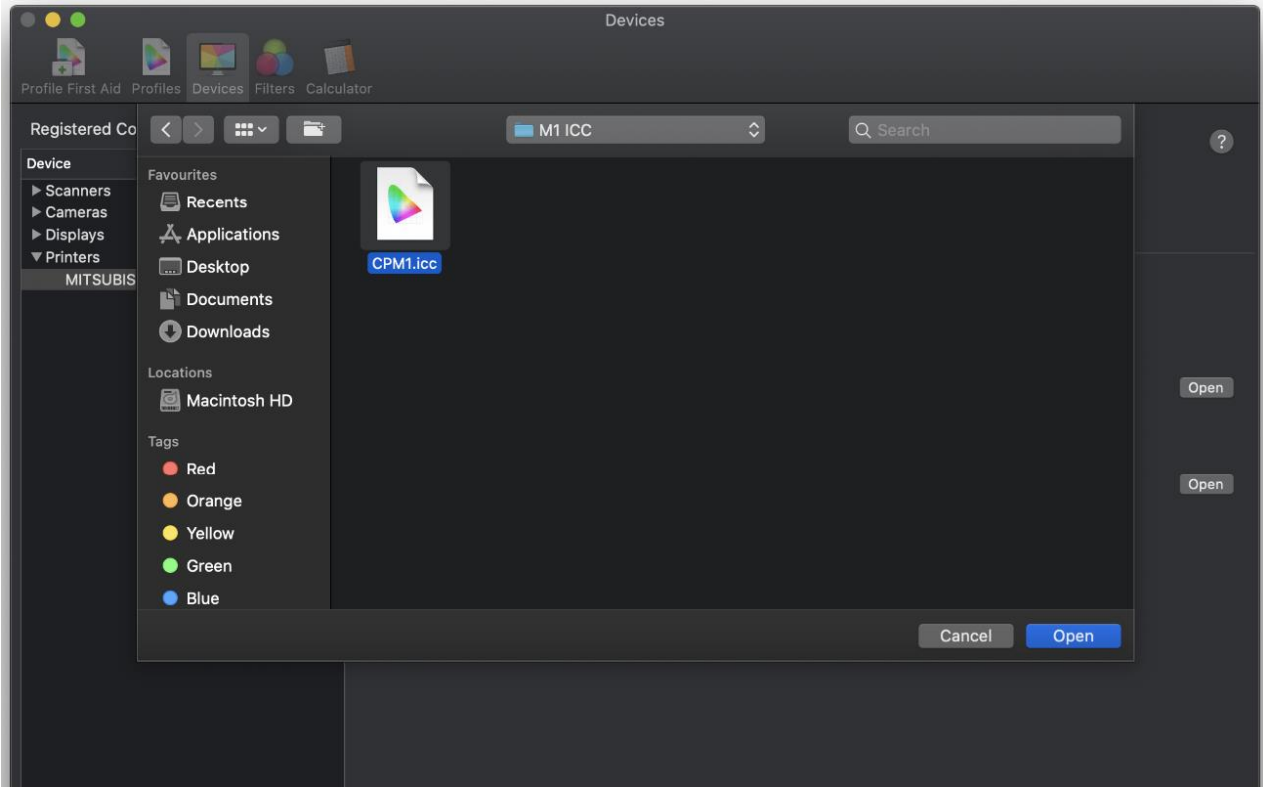

Click the icon next to Current Profile and select other.

(Some screenshots will show here CP-M1, please ignore and go for ICC for CP-D90 printer)

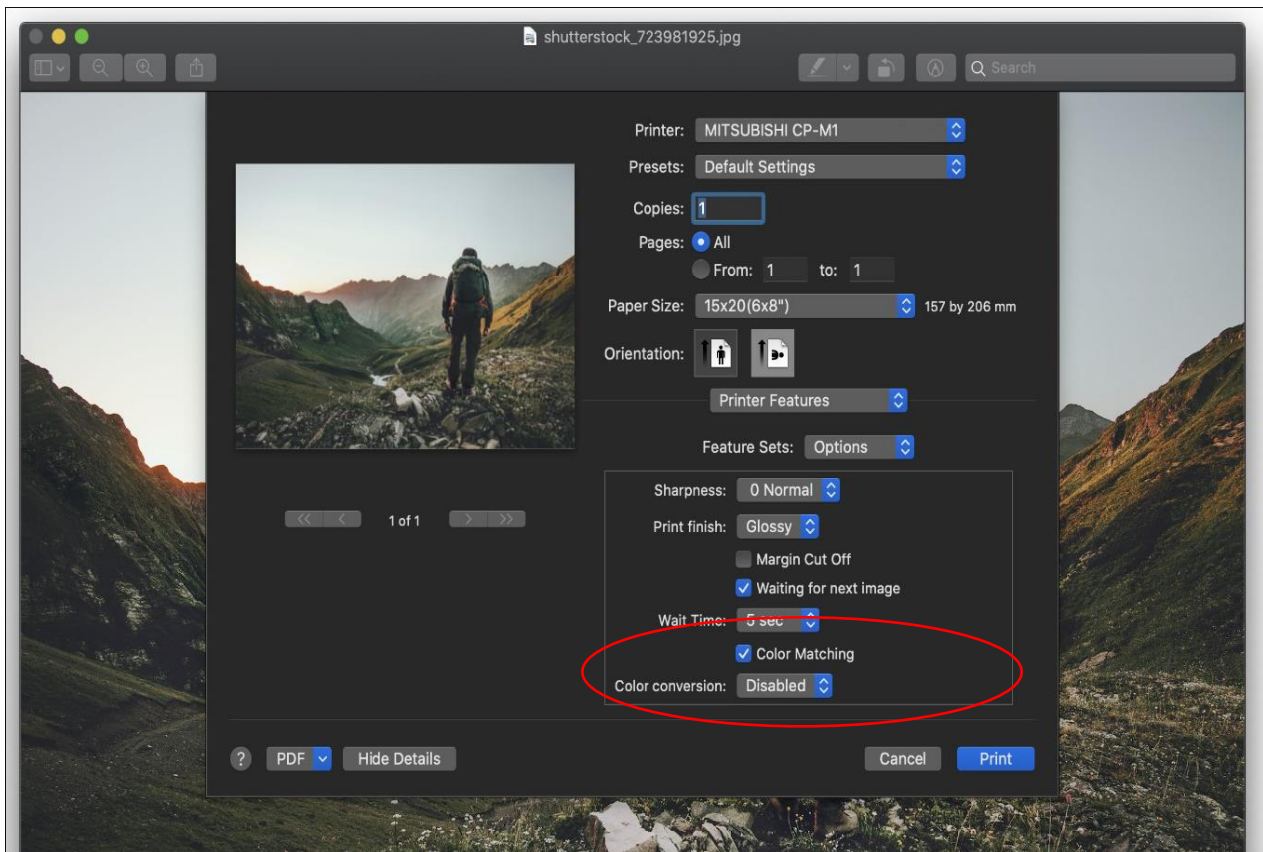

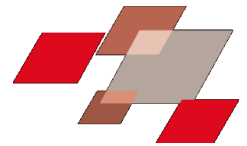

Browse and select the ICC file for CP-D90DW  
(Some screenshots will show here CP-M1, please ignore and go for ICC for CP-D90 printer)

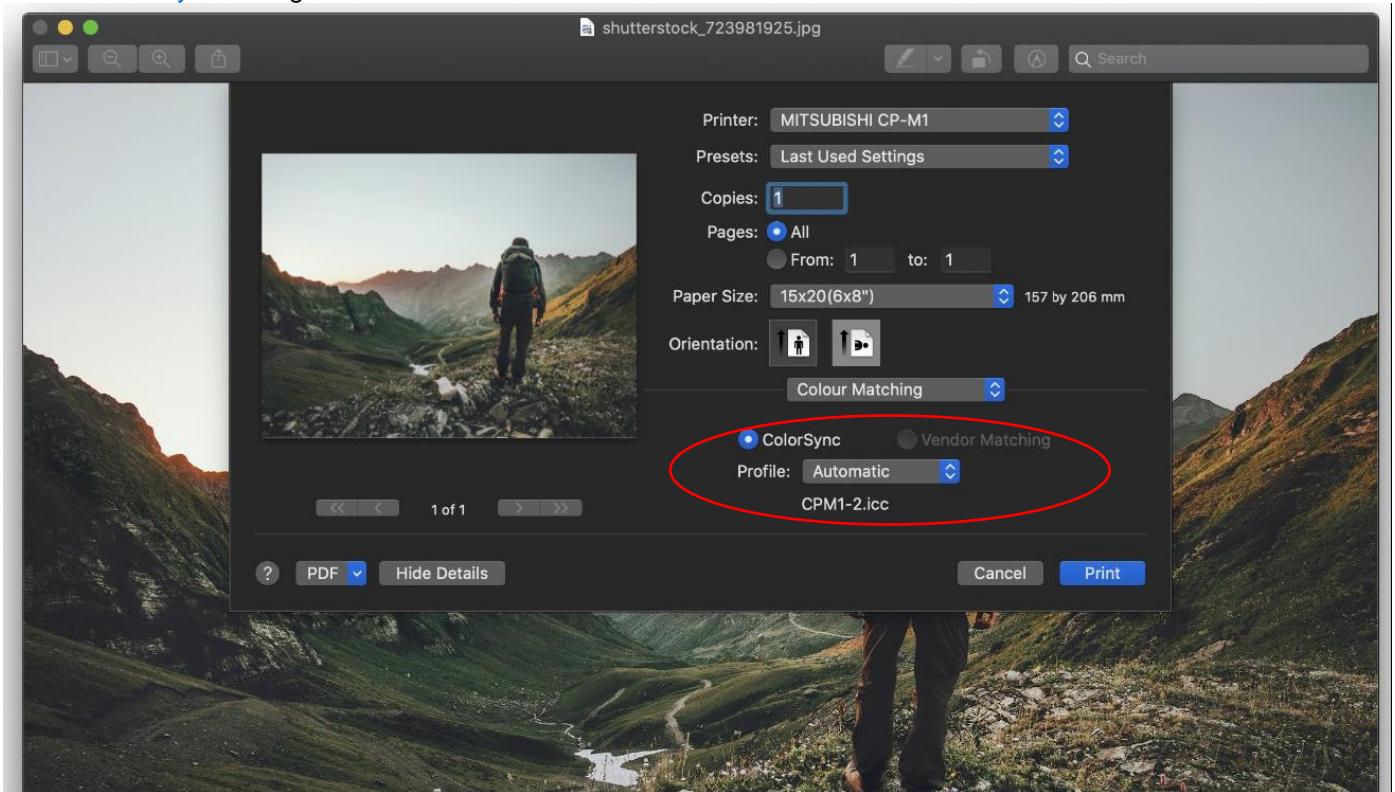

To apply the ICC on printing dialog go to printer features and enable **Color Matching** and **Color Conversion**

Set the **ColorSync** settings to **Automatic**

Your Mac is now ready to print using the ICC profile.
